SUMMARY

Software Development Engineer with experience in designing and deploying scalable backend systems, developing REST APIs, and implementing automation workflows. Skilled in optimizing database performance, managing server deployments, and setting up CI/CD pipelines for reliable application delivery. Proven ability to deliver secure, efficient, and production-ready solutions through real-world projects and internships.

TECHNICAL SKILLS

Languages: Java, Python, Html/Css

Frameworks/Technologies: Spring Boot, Django, Flask

Databases: MySQL

Tools/DevOps: Git, Jenkins, Gunicorn, Nginx, PM2, cPanel, aaPanel

Operating Systems: Windows, Linux (CentOS, Ubuntu)

EXPERIENCE

Wilgax Global | Software Development Engineer 🔗   09/2024 – Present
- Developed REST APIs using Java Spring Boot, improving backend performance.
- Designed and maintained MySQL schemas, reducing query execution time by 25%.
- Automated deployment pipelines with Jenkins CI/CD, cutting release time by 40%.
- Deployed and monitored applications using Nginx, Git, and PM2 to ensure stable and reliable performance.

V Think Solution | Software Development Engineer 🔗   12/2023 – 08/2024
- Deployed and maintained Django applications with MySQL databases, optimizing query performance.
- Developed image processing APIs, video tools, and automated WhatsApp messaging (100+ daily), reducing manual work by 35%.
- Created an ID card generator API with text overlay and QR codes to streamline verification.
- Configured Apache with SSL/TLS certificates, ensuring secure and reliable deployments.

PROJECTS

Agro-Connect, *Java, Spring Boot, Mysql | Source Code* 🔗   05/2025
- Designed a platform for farmers to post crop details and connect with buyers and distributors.
- Enabled regional language support, smart search, and secure messaging between users.

Birds-Rescue, *Python, Django, Mysql, WhatsApp API | Source Code* 🔗   06/2024
- Developed a web application to facilitate the rescue and reporting of injured birds.
- Implemented features for users to report sightings, track rescue operations, and provide updates on the birds' status.

Hashtag Generator, *Python, Django | Source Code* 🔗   12/2023
- Created a tool or web-based application that generates relevant and popular hashtags for social media posts.
- Key functionalities include categorizing and indexing content on platforms like Twitter, Instagram, and Facebook.

ACHIEVEMENTS

Java, Python and MySQL certificates, *HackerRank* 🔗

certificates in data visualization, data Analyst, Django, WordPress, applications security, and web analytics,
Great Learning, e-marketing and Simplilearn 🔗

EDUCATION

Masters Of Computer Applications (CGPA of 7.59), *Uka Tarsadia University*   08/2022 – 07/2024
Gujarat, India

Bachelors of Computer Applications (CGPA of 6.61), *Veer Narmad South Gujarat University*   07/2019 – 04/2022
Gujarat, India
